

APCI Analysis: NHIS

Age–Period–Cohort–Interaction model (Luo & Hodges, 2020)

Age Main Effects

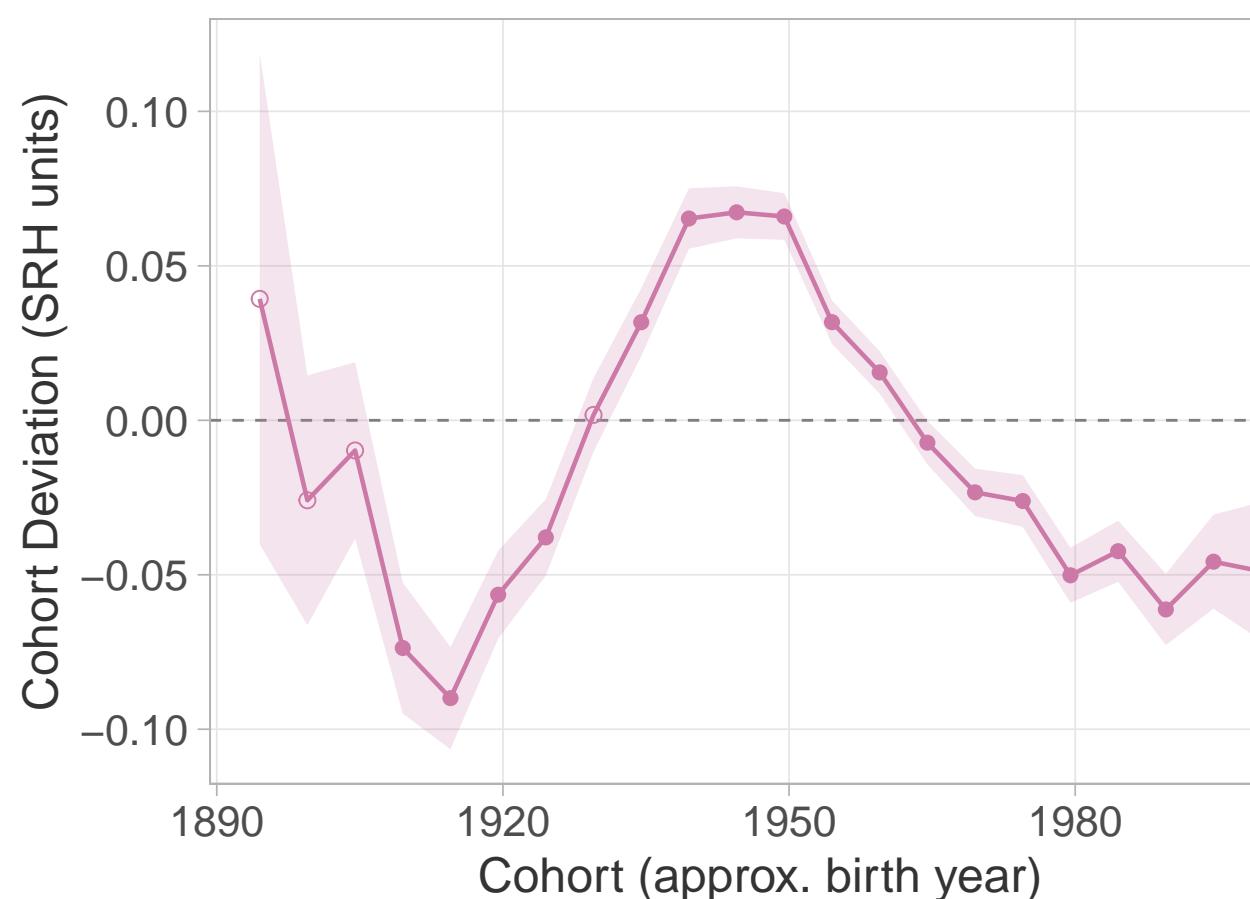

Period Main Effects

Inter-Cohort Deviations: NHIS

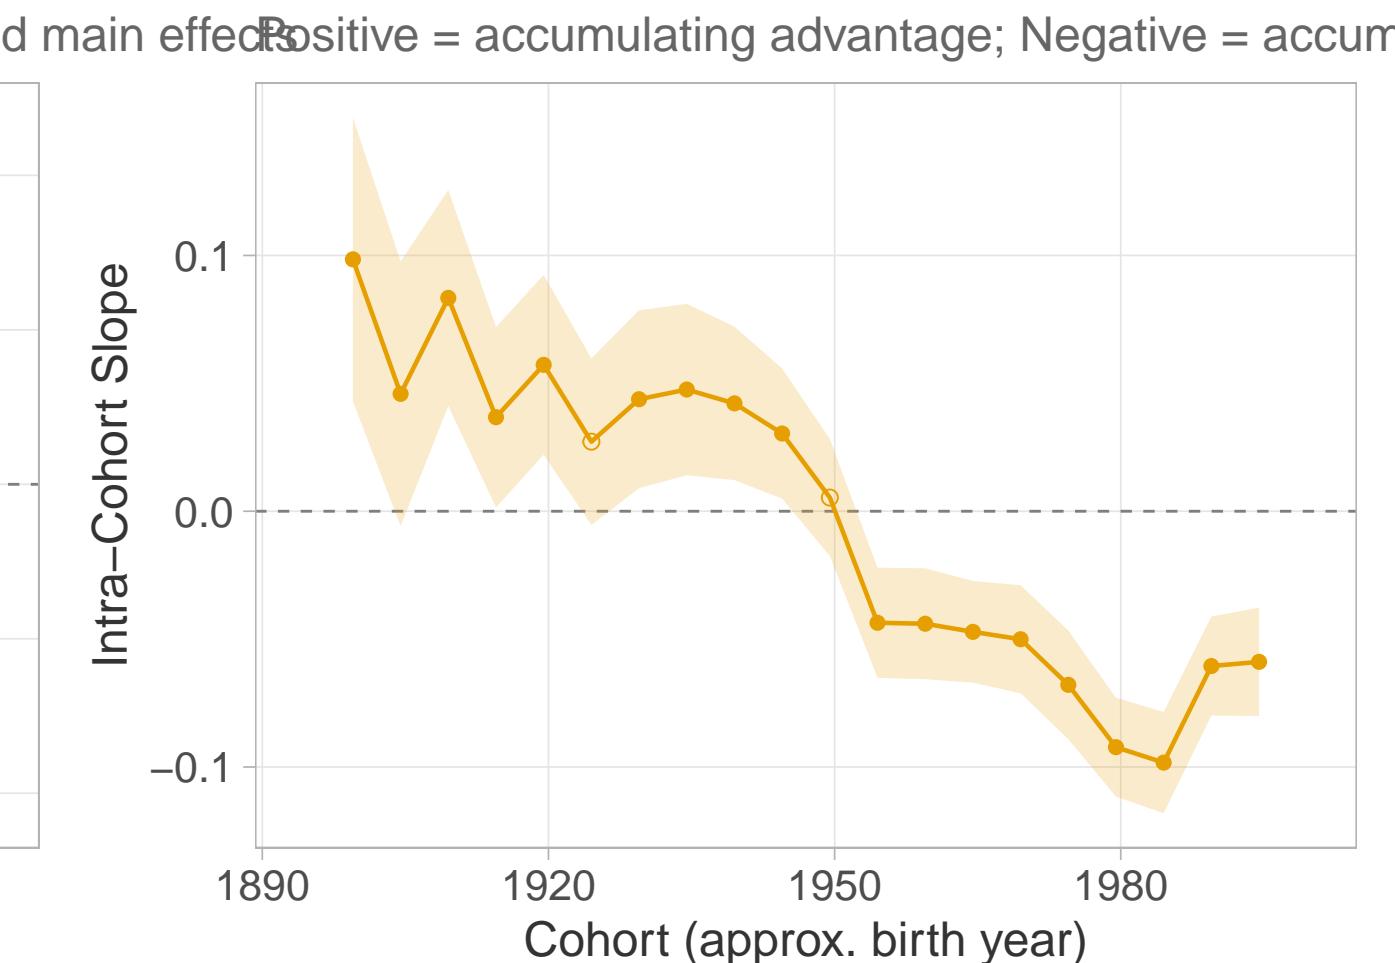

Average deviation of each cohort from age + period main effects
Positive = accumulating advantage; Negative = accumulating disadvantage

Significance ○ Not sig. ● p < 0.05

Filled points = p < 0.05

Intra-Cohort Life-Course Slopes: NHIS

Significance ○ Not sig. ● p < 0.05

Filled points = p < 0.05
