# APCI Analysis: GSS

Age–Period–Cohort–Interaction model (Luo & Hodges, 2020)

Age Main Effects

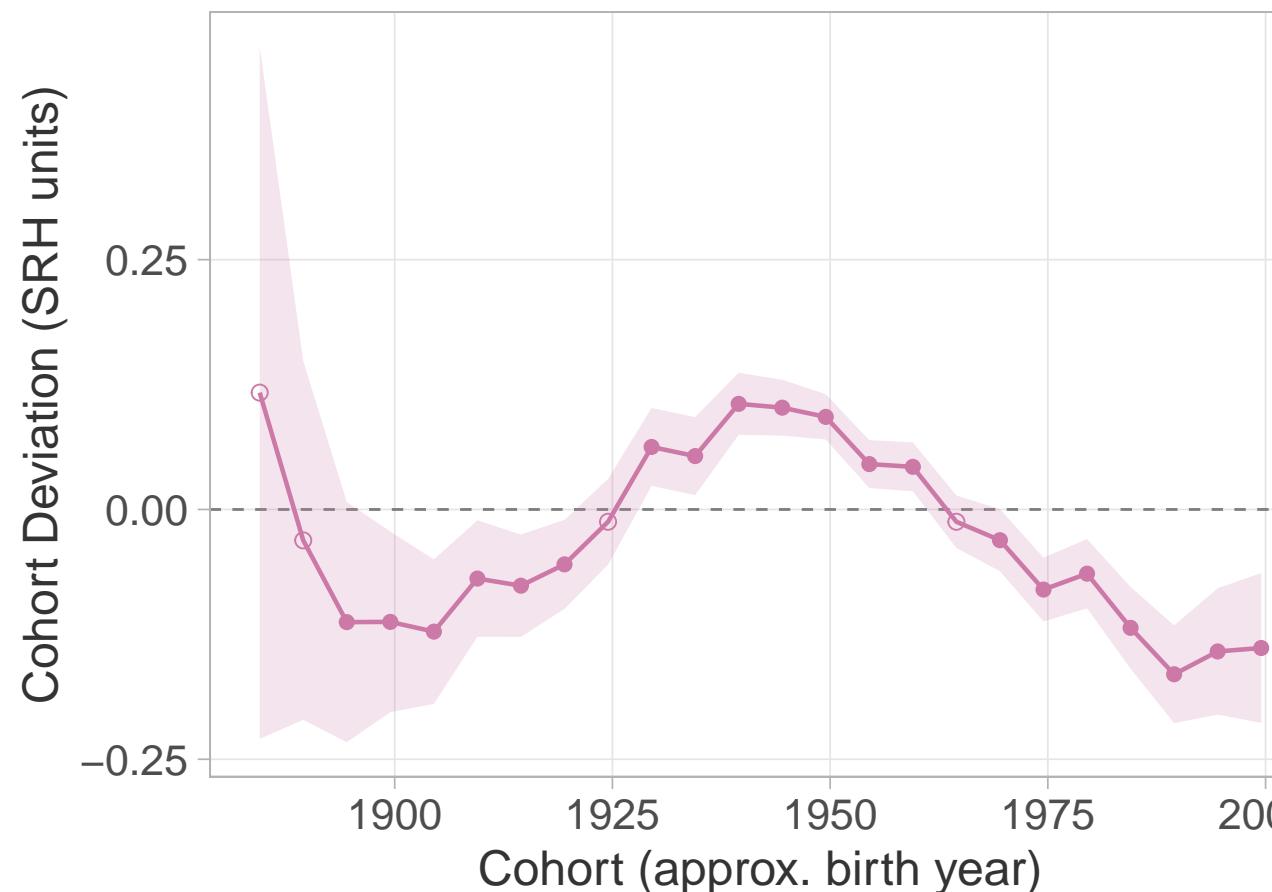

Period Main Effects

Inter–Cohort Deviations: GSS
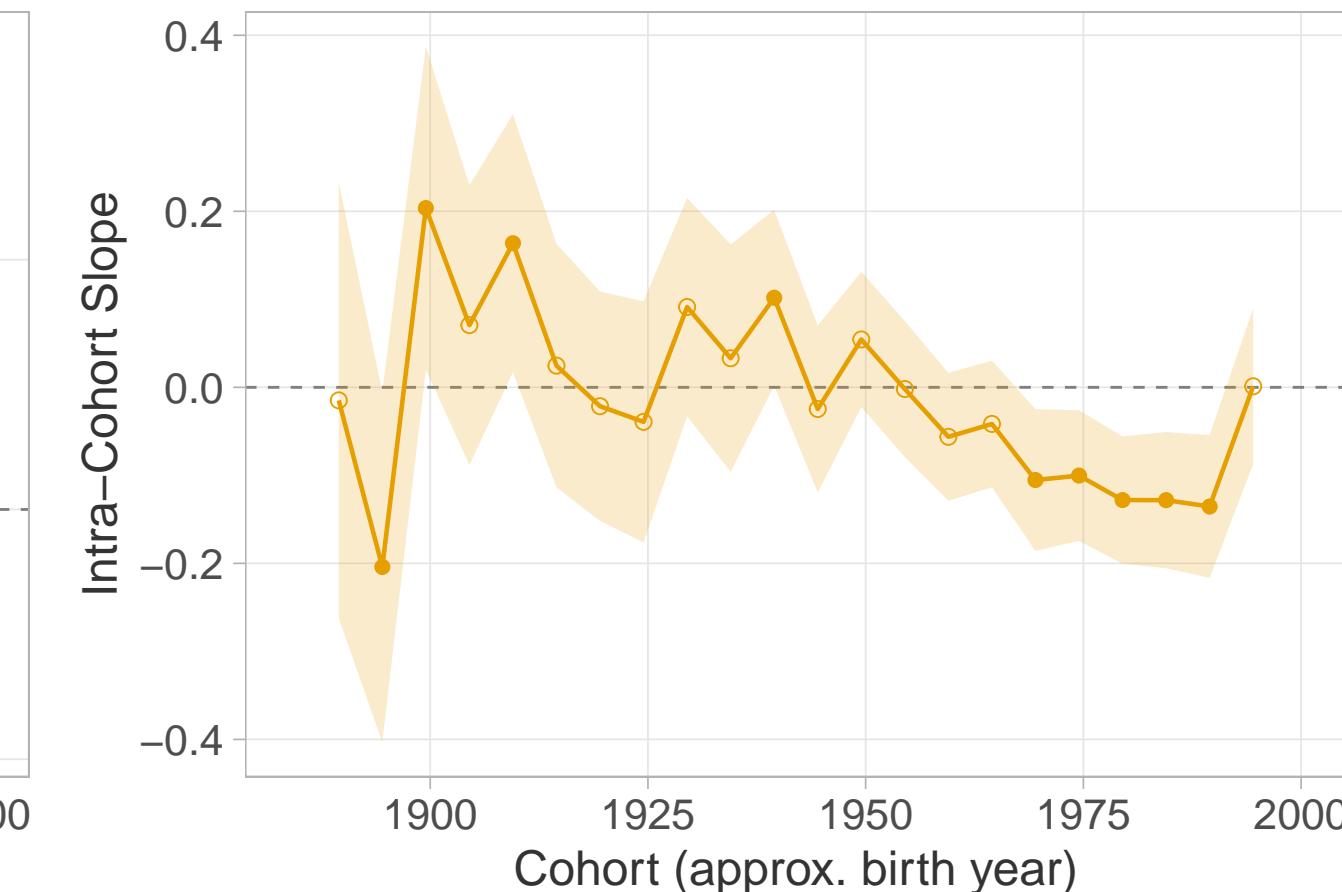

Average deviation of each cohort from age + period main effects

Significance ○ Not sig. ● $p < 0.05$

Filled points = $p < 0.05$

Intra–Cohort Life–Course Slopes: GSS

Positive = accumulating advantage; Negative = accum

Significance ○ Not sig. ● $p < 0.05$

Filled points = $p < 0.05$
